

The simple maintenance solution for **ALL** machines serviced at a central location.

The QuickFit™ system utilizes the state-of-the-art PERT™ process to **Purge** the filters, **Evacuate** the sump, then **Refill** the engine via its new filters and automatically **Timestamp** the service event. With just one fitting per compartment, the QuickFit system allows you to service most machines in less than 30 minutes. Filters are easily purged to eliminate hot oil spills, then automatically filled and new oil is completely filtered for improved continuous Contamination Control. The unique timestamp feature can automatically record the service and enables you to efficiently manage fluids for engines, transmissions and hydraulic reservoirs. Maintenance becomes simple. Productivity goes up. And the risk of spills and contamination is virtually eliminated.

For a lot of fleets, routine maintenance has become anything but routine.

Machines sit idle for hours during “simple” oil changes. Technicians risk injury removing hot filters and climbing under or around the machines. Hot oil spills endanger your technicians AND the environment. The solution? The QuickFit™ system from RPM Industries.

We guarantee all RPM systems that feature the PERT™ process up to \$10,000.

Simply Safer

- Complete servicing from a single point.
- Virtually no need to climb under or on top of machines.
- Live dipstick read immediately after refill.
- Fewer steps mean less chance of error and injury.

Simply Cleaner

- Purges filters and evacuates the sump directly to final containment.
- Completely closed loop process.
- No spills, dripping filters, drain pans or intermediate containers.
- \$10,000 Environmental Guarantee. Ask about details.

Simply Faster

- Complete engine oil and filter change in less than 30 minutes.
- Complete 250- or 500-hour service in about an hour.
- Reduces typical PM times by 1.5 to 2.5 hours PER service.
- Increases technician capacities... do more with your existing people.
- Increases machine availability while saving labor costs.

Simple to Migrate

As your equipment needs change, the QuickFit system can be easily upgraded to:

- RPM's QuickEvac™ system, which provides onboard, self-contained service capabilities for enhanced servicing in the field.
- RPM's MultiVac™ system, which expands QuickEvac's capabilities to transmissions, differentials and hydraulic fluids.
- Engine prelubrication, which is included with both the QuickEvac and MultiVac systems.

Gain Hours of Machine Availability

- Paybacks in 12 months or less.
- Service in less than 30 minutes.
- Gains 1.5 - 2.5 hours of machine availability, per service.
- Fits virtually all machines, new or old.
- Carries a comprehensive 12-month, unconditional parts warranty.

Whenever you see the PERT symbol, you're looking at a solution that combines incredible ease of use with comprehensive functionality. Pioneered by RPM Industries, the PERT process makes it possible to not only perform routine maintenance safer, cleaner, and faster, but also document it automatically... all in less than 10 minutes per compartment!

- **Purge** with compressed air so that old filters can be removed and clean filters can be installed. No spills, no burns, absolutely clean and safe.
- **Evacuate** contaminated fluids quickly and cleanly.
- **Refill** with new oil entering engine via new filters to filter the oil and fully pressurize the engine.
- **Timestamp** the service to automatically document the maintenance event.

PERT technology is the only GUARANTEED SAFE way to change fluids. Available only with the QuickFit™, QuickEvac™ and MultiVac™ systems.
